## Decades-Long Quest Reveals Details of the Proton's Inner Antimatter

27 |

Twenty years ago, physicists set out to investigate a mysterious asymmetry in the proton's interior. Their results, published today, show how antimatter helps stabilize every atom's core.

**cosmic neutrinos?**

Nature of **Quark-Gluon Plasma**  
in **heavy-ion collisions?**

# From proton structure to machine learning

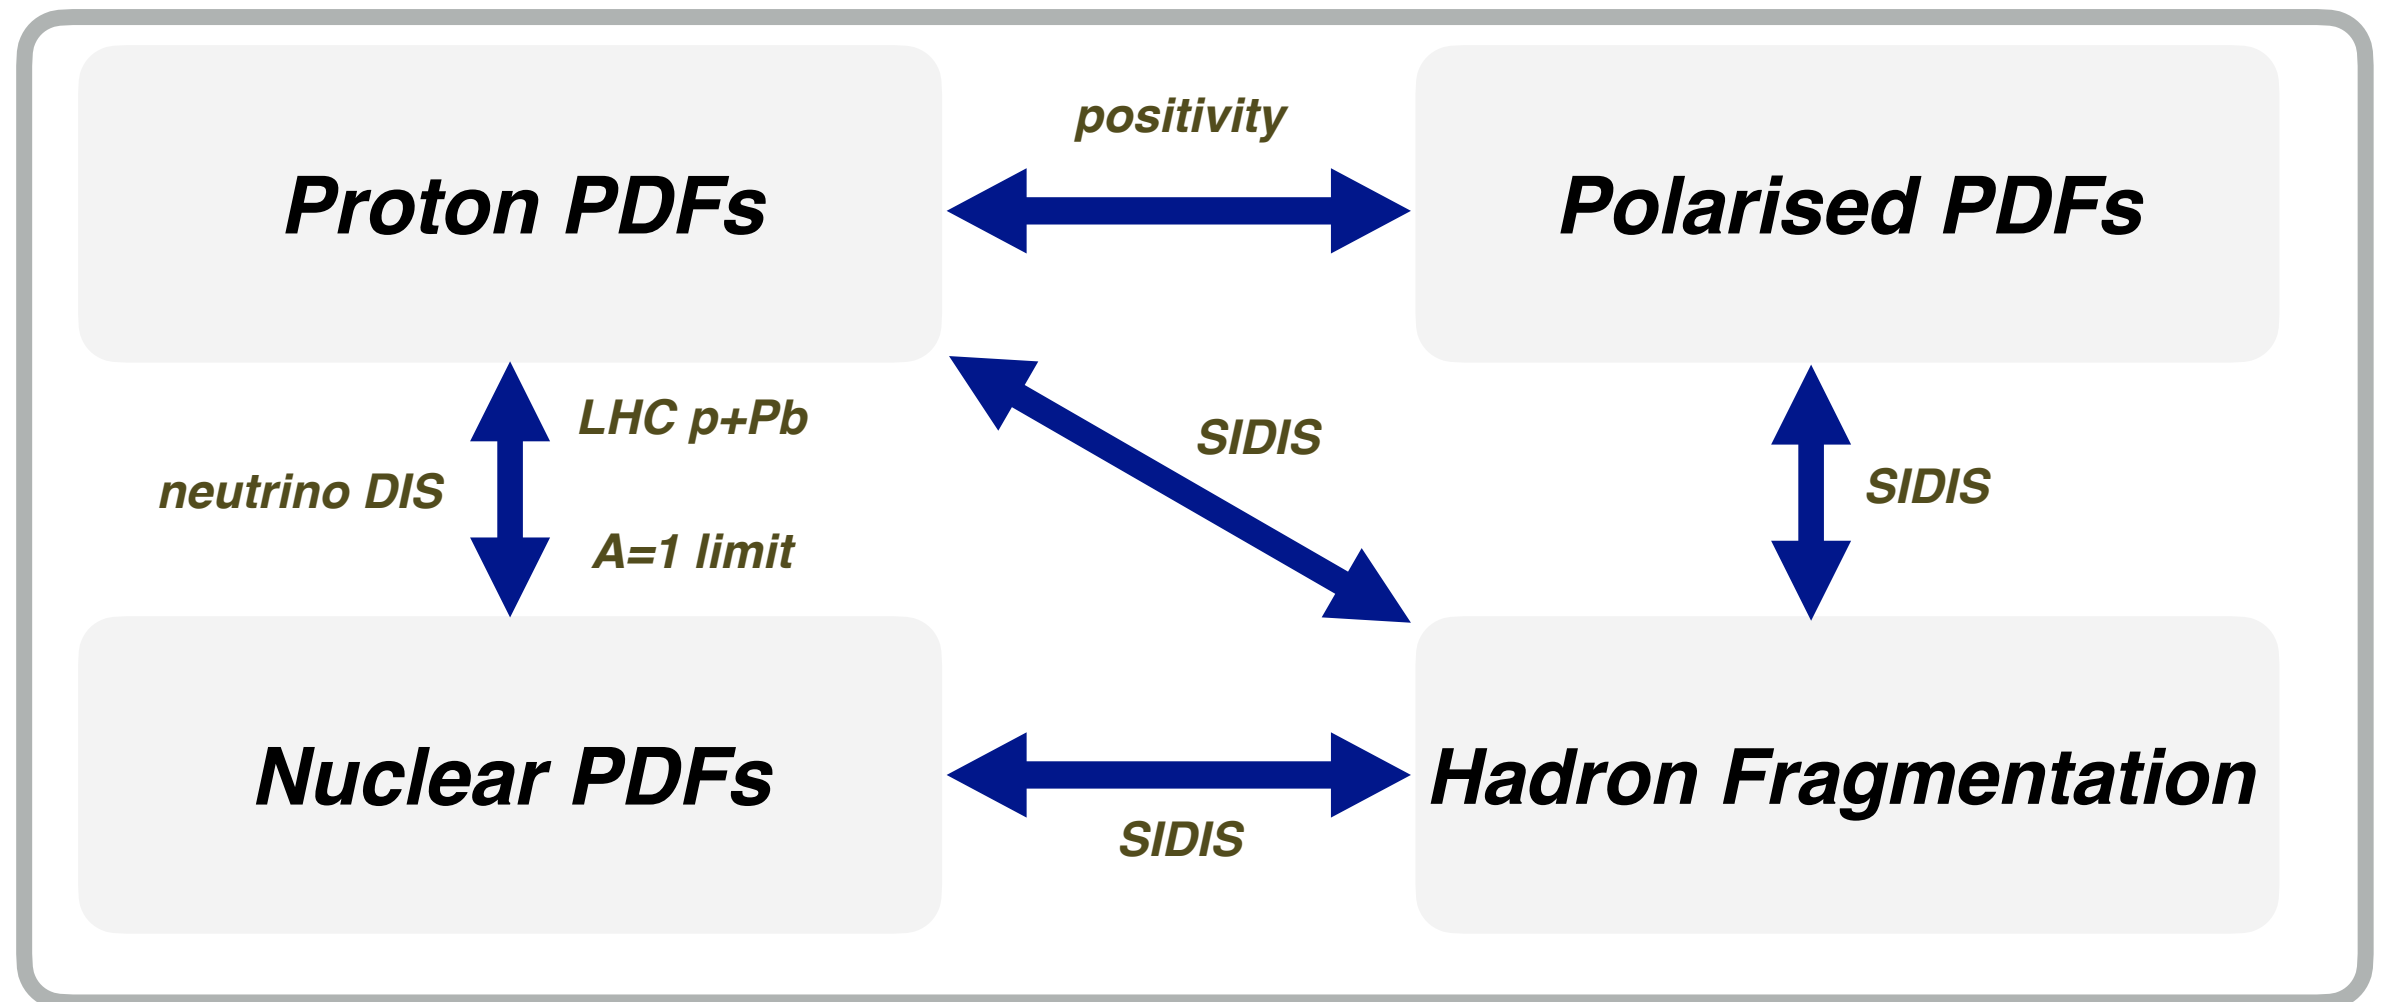

- The proton structure is described by quantities known as **parton distributions**, which need to be extracted from data
- In my research I use **deep learning tools** to parametrise parton distributions (PDFs) and related quantities such as nuclear PDFs (nPDFs) and hadron fragmentation functions (FF)

# Goal of ASDI project

Determine **simultaneously** proton, deuteron, and heavy nuclear PDFs together with **polarised PDFs** and **fragmentation functions**

Essential to boost our understanding of the **strong nuclear force** and to lay the groundwork for the science of the upcoming **Electron Ion Collider**

# Goal of ASDI project

Determine **simultaneously** proton, deuteron, and heavy nuclear PDFs together with **polarised PDFs** and **fragmentation functions**

	standard approach	universal QCD analysis
fragmentation functions	$N(p + p \rightarrow \pi) \propto \sum_{i,j,k} \tilde{\sigma}_{ij \rightarrow k} \otimes f_i^{(p)} \otimes f_j^{(p)} \otimes f_{k \rightarrow \pi}$	$N(p + p \rightarrow \pi) \propto \sum_{i,j,k} \tilde{\sigma}_{ij \rightarrow k} \otimes f_i^{(p)} \otimes f_j^{(p)} \otimes f_{k \rightarrow \pi}$
nuclear PDFs	$N(p + \text{Pb} \rightarrow W) \propto \sum_{i,j} \tilde{\sigma}_{ij \rightarrow W} \otimes f_i^{(p)} \otimes f_j^{(A)}$	$N(p + \text{Pb} \rightarrow W) \propto \sum_{i,j} \tilde{\sigma}_{ij \rightarrow W} \otimes f_i^{(p)} \otimes f_j^{(A)}$
proton PDFs	$N(\nu + \text{Pb} \rightarrow \mu^+ \mu^-) \propto \sum_i \tilde{\sigma}_{i \rightarrow \mu^+ \mu^-} \otimes f_i^{(p)} \times \left( \frac{f_i^{(A)}}{f_i^{(p)}} \right)$ <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> <math>\uparrow</math> theory         </div> <div style="text-align: center;"> <math>\uparrow</math> fitted         </div> <div style="text-align: center;"> <math>\uparrow</math> fixed         </div> </div>	$N(\nu + \text{Pb} \rightarrow \mu^+ \mu^-) \propto \sum_i \tilde{\sigma}_{i \rightarrow \mu^+ \mu^-} \otimes f_i^{(p)} \times \left( \frac{f_i^{(A)}}{f_i^{(p)}} \right)$ <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> <math>\uparrow</math> theory         </div> <div style="text-align: center;"> <math>\uparrow</math> fitted         </div> </div>

Essential to boost our understanding of the **strong nuclear force** and to lay the groundwork for the science of the upcoming **Electron Ion Collider**

# Challenges and eScience contribution

- ☑ **Computing overhead from model training:** extend NNPDF framework to run on **GPUs**, in particular the grid representation of QCD convolutions (current bottleneck)
- ☑ **Algorithmic hyperoptimisation in ML:** explore novel **ML hyperoptimisation strategies** leading to superior performance (tens of hyperparams considered)
- ☑ **Efficient database management:** organize, access, and exploit the hundreds (or thousands) of individual measurements of the universal fit while reducing their memory footprint,
- ☑ **Dimensional reduction and data visualization**

**brute-force calculation**

$$N(p + \text{Pb} \rightarrow \pi + X) \propto \sum_{i,j,k=u,d,g,\dots}^{n_f} \int dx_1 \int dx_2 \int dz \tilde{\sigma}_{ij \rightarrow k+X}(x_1, x_2, z, Q) \left( f_i(x_1, Q, 1) f_j(x_2, Q, A_{\text{Pb}}) f_{k \rightarrow \pi}(z, Q, A_{\text{Pb}}) \right)$$

$$f_i(x, A, Q) = \sum_{j=u,d,g,\dots}^{n_f} \int dQ' \int dz \Gamma_{ij}(x/x', Q'/Q_0) f_j(x', A, Q_0)$$

**via grid interpolation (NNPDF method)**

$$N(p + \text{Pb} \rightarrow \pi + X) \propto \sum_{m,n,p=1}^{n_x} \sum_{i,j,k}^{n_f} (\mathbf{FK}_{m,n,p,i,j,k}) \times \left( f_i(x_m, Q_0, 1) f_j(x_n, Q_0, A_{\text{Pb}}) f_{k \rightarrow \pi}(z_p, Q_0, A_{\text{Pb}}) \right)$$
